

### **Team Chat and Video call:**

The nurse can easily chat with the patient or use the video call feature to consult the doctor remotely and provide effective patient care. A lot of patients prefer remote consulting through phone calls and video calls. Yaraa manager is specially built for One to one chat, Group chat, Virtual meetings with Zoom, and Google meet.

### **Deliver Patient care on Time:**

Yaraa has a time tracking system inbuilt for any assigned task or care activity to the nurse. It also has a location tracking feature that can be used to confirm nurse check-in. Time tracker will track the time taken for giving care to patients and a report can be generated for billing purposes.

### **Daily Medicine Reminder and care Reminder:**

Yaraa Manage mobile app can be used to set up recurring tasks like medicine reminders three times a day or checking up on the Body Vitals of patients. The nurse can also record these vitals in the system through notes / Comments.

### **Changes in Nurse Roster do not affect patient care:**

Since all the patient medical records and tasks to be performed are recorded in the system it is easy to deliver patient care even in the case when the regular caregiver has to be replaced with another caregiver.

## **ABOUT YARAA**

Yaraa Manager is the easiest way to manage Remote teams, Projects, and Tasks. Yaraa is an AI-powered Business suite that Creates projects & Task Scheduling Without human Interaction. Team members can chat and talk with each other with ease. It gives teams everything they need to stay in sync, hit deadlines, and reach their goals.
